

## Instruction to ABC Vietnamese Software

You have to choose .VnTime or any other .VnXXX fonts so your screen can display Vietnamese fonts properly.

This software requires English version of Windows. It will not work with Chinese Windows.

For vowels:

ê = e + e

ô = o + o

ư = w OR u + w

(PS. Type w again, then ư will become w)

ơ = o + w

â = a + a

ã = a + w

For consonant:

đ = d + d

Đ = D + D

For tones: (a represents vowels)

á = a + s

à = a + f

ã = a + x

ạ = a + j

ả = a + r

To type English words:

Retype the letters which have been converted into Vietnamese fonts.

For example:

English = E + n + g + l + i + s + s + h

To reactivate ABC

Go to c:\program files\abc

And then double click on the abc.exe
